- A goal-driven CSE student specializing in Artificial Intelligence, with a keen interest in machine learning and a passion for data science, aiming to develop practical AI solutions.

Education

B.Tech in Computer Science and Engineering (Artificial Intelligence), Amrita Vishwa Vidyapeetham, Coimbatore

- CGPA: 7.65/10
- 2023 - 2027

BS in Data Science and Applications, IIT Madras

- Currently Pursuing

Experience

Full Stack Development Intern, VDart

- Designed and developed a resume parser and basic ATS using Python tailored to job-description filtering.
- Implemented robust file-handling logic and dynamic front-end forms with validation.
- Completed over 80 hours, delivering a production-ready solution.

Projects

Robotic Arm Mounted on a Four-Wheeled Drive Vehicle

- Designed and built a four-wheeled vehicle with mounted robotic arm for object manipulation.
- Implemented motion-control algorithms using Arduino and C++.
- Integrated sensors for obstacle detection and automated pick-and-place operations.

Analysis of Sequence Alignment Methods for Cyanobacteria Strains

- Compared Needleman-Wunsch and Smith-Waterman alignments and K-means clustering on cyanobacteria gene sequences.
- Computed similarity scores and performed cluster analysis to infer evolutionary relationships.
- Developed Python scripts with Biopython for sequence processing and visualization.

IoT-based Healthcare Monitoring and Diverse Disease Prediction

- Developed IoT system with Arduino Mega 2560 and biomedical sensors (SpO2, heart rate, temperature).
- Implemented ML models (SVM, Logistic Regression) in Python for diabetes, heart disease, and Parkinson's prediction.
- Created real-time data visualization interface using Streamlit.

KNN-based Stock Rise and Fall Predictor

- Analyzed Apple stock data (2021–2023) with `yfinance` and built a KNN model for price movement prediction.

University Management System

- Developed a Java & SQL-based system managing faculty, fees, student records, and course enrollments with secure DB integration.

Urban Utopia: Property Listing Website

- Designed a responsive property listing site using HTML, CSS, and JavaScript for smooth navigation and intuitive UI.

Handwriting Detection & Authentication

- Implemented handwriting authentication via TensorFlow CNN models validating writing patterns against stored templates.

Skills

- **Programming Languages:** Python, JavaScript, C/C++ , Java, SQL
- **Web Dev:** HTML5, CSS3, Tailwind, Bootstrap, React.js, Node.js, Express.js
- **Backend & DB:** Supabase, Firebase, MongoDB, PostgreSQL, Flask
- **ML & Data Science:** Scikit-learn, Pandas, NumPy, Matplotlib, Gradient Boosting, KNN, CNN, ADMM, K-means
- **Tools & Platforms:** Git, GitHub, Vercel, VS Code, Arduino IDE, Raspberry Pi, ESP32
- **Other:** REST APIs, JSON, File Handling, Resume Parsing, ATS logic, Data Visualization
- **Languages:** English (Fluent), Tamil (Native), Hindi (Fluent)
